Professional Summary

Systems Engineer and BI Analyst with over 5 years of experience in the manufacturing and fintech industries. I specialize in data pipeline automation, dashboard design, and real-time analytics to support strategic decision-making.

Strong background in Power BI, SQL, RStudio, Python, Power Query, and Jupyter Notebooks. Proven track record of leading digital transformation projects that reduce costs, increase data visibility, and deliver business value through intelligent reporting systems.

Experience

Business Intelligence Data Analyst - B2S Núcleos Fintech (2024 - Present)

- Built strategic Power BI dashboards for the fintech sector across LATAM and US regions.
- Integrated real-time insights using Power BI, Power Query, RStudio, and Jupyter Notebooks.
- Applied agile methodologies to ensure alignment and timely delivery of BI objectives.
- Leveraged SQL as an ETL tool to generate business insights and support decision-making.

Operations BI System Information Coordinator - Pozuelo (Nutresa Group) (2008 - 2024)

- Designed a master KPI sheet, migrated it to Power BI, saving over \$100K.
- Automated ETL processes using Python for inventory, logistics, and cost metrics.
- Built in-plant dashboards using SAP, Excel, and real-time shop floor data.
- Developed and refined leadership and interpersonal skills while leading a team of 6 people for 7 years, consistently ranking in the top 3 in employee climate surveys.
- Key project: Developed a no-paper MES-style plant reporting solution for manufacturing clients -> \$150,000/year in savings.

Education

Bachelor's Degree in Systems Engineering - Thesis Mode

Universidad Hispanoamericana, Heredia, Costa Rica

Certifications

- PL-300: Microsoft Power BI Data Analyst - June 2025
- Data Analyst with Power BI - DataCamp (2025)
- Python for Data Analysis - DataCamp (2025)
- Excel Analytics - Great Learning (2023)
- Azure Fundamentals - Great Learning (2023)
