Professional Summary

Systems Engineer and BI Analyst with over 5 years of experience in the manufacturing and fintech industries. Specialized in data pipeline automation, dashboard design, and real-time analytics to support strategic decision-making. Additionally, over 5 years of experience in production planning and scheduling, including MPS design, MRP simulations, cost analysis, and plant performance improvement initiatives. Strong background in Power BI, SQL, RStudio, Python, Power Query, and Jupyter Notebooks. Proven track record leading digital transformation projects that reduce costs, increase data visibility, and deliver business value through intelligent reporting systems.

Experience

- Business Intelligence Data Analyst - B2S Núcleos Fintech (2024 - Present)
- Developed strategic Power BI dashboards for the fintech sector in LATAM and US.
 - Integrated real-time insights using Power BI, Power Query, RStudio, and Jupyter Notebooks.
 - Applied agile methodologies to ensure alignment and timely delivery of BI goals.
 - Used SQL as an ETL tool to generate insights and support decision-making.
- Senior Production Planner - Pozuelo (Nutresa Group) (2019 - 2024)
- Led production planning and execution initiatives, including MPS design, MRP simulations with Python, and process order cost analysis.
 - SAP ERP master data and PP/Inventory module expert.
 - Drove CAPEX investment projects to improve production compliance, reduce costs, enhance energy efficiency, and support digital transformation.
- Operations BI System Information Coordinator - Pozuelo (Nutresa Group) (2008 - 2019)
- Designed a master KPI dashboard and migrated it to Power BI, saving over \$100K.
 - Automated ETL processes with Python for inventory, logistics, and cost metrics.
 - Built real-time dashboards in-plant using SAP and Excel.
 - Key project: MES-style paperless plant reporting system -> \$150,000/year in savings.
 - Developed leadership and communication skills by managing a team of 6 people for 7 years, ranking top 3 in employee satisfaction surveys.

Education

Bachelor's Degree in Systems Engineering - Thesis Mode

Universidad Hispanoamericana, Heredia, Costa Rica

Certifications

- PL-300: Microsoft Power BI Data Analyst - June 2025
- Data Analyst with Power BI - DataCamp (2025)
- Python for Data Analysis - DataCamp (2025)
- Excel Analytics - Great Learning (2023)
- Azure Fundamentals - Great Learning (2023)

Skills

Power BI, SQL, RStudio, Python, Jupyter Notebooks, Power Query, Excel

Production Planning, MPS Scheduling, MRP Simulation, Inventory Control, Service Level Optimization.

ETL Automation, KPI Modeling, Cost Optimization, Manufacturing Analytics.

Agile BI Delivery, Insight Generation, Web UI with React and Next.js.

Soft Skills: Team leadership, interpersonal communication, adaptability, team motivation.

Projects

- Paperless Plant System: MES-style reporting and KPI tracking -> \$150K/year savings.
- Power BI Migration: KPI system with automated alerts -> \$100K+ ROI.
- Web Portfolio: Interactive website with AI FAQ, 3D animations, and project showcase.
- MPS Optimization: Weekly scheduling algorithm improved compliance by 15%.
- MRP Simulator in Python: Simulated material needs by shift to detect shortages -> improved inventory and purchasing efficiency.
- Energy Efficiency CAPEX Project: Replaced high-demand equipment with efficient tech -> ROI < 18 months, 12% energy savings.

Languages

Spanish: Native | English: Advanced (B2-C1)
