

Alexis Pizarro Abarca

Senior Supply Chain Data Analyst | Information Systems Engineer

Heredia, Costa Rica | alexpizarro3@gmail.com | [LinkedIn](#) | [GitHub](#) | alexispizarroportafolio.vercel.app

PROFESSIONAL SUMMARY

Experienced Information Systems Engineer and Data Integration Specialist with over 12 years of progressive engineering leadership across supply chain operations, technical data infrastructure, and cross-functional project management. Proven expertise within the Google ecosystem, architecting scalable data workflows with PLX Scripts, BigQuery, and GoogleSQL, complemented by enterprise Microsoft Power BI development. Accomplished track record of leading digital transformation initiatives that deliver substantial operational efficiency and over \$500K in documented cost savings. Expert in automating complex business workflows using Python RPA, Google Apps Script, and Power Automate. Actively leveraging Generative AI (Google Gemini, NotebookLM, Gems) to accelerate data workflows, improve analytical precision, and streamline delivery. Proven Agile Leader and Scrum Master facilitating ceremonies, unblocking technical hurdles, and driving high team velocity.

TECHNICAL SKILLS & TOOLING

- **Google Data Stack & Warehousing:** PLX Scripts, BigQuery, GoogleSQL, PostgreSQL, Microsoft SQL Server, Data Warehousing, Data Modeling, ETL/ELT pipeline design, and data governance.
- **BI & Advanced Visualization:** Looker Studio & Enterprise Looker, Microsoft Power BI (Star Schema modeling, Advanced DAX, Power Query M code), PLX Dashboards, and Advanced Excel (Power Pivot, VBA).
- **Process Automation & Generative AI:** Python (RPA automation with Selenium, PyAutoGUI, Pandas, NumPy), Google Apps Script, Power Automate, Google Gemini AI, NotebookLM, Veo, Gemini Gems, Prompt Engineering, and API integrations.
- **Project Management & Agile Administration:** Buganizer (Issue Tracking & Component Management), TaskFlow Portfolios, Aurora (JIRA-like tool Administration), Scrum Master (Sprint planning, Backlog grooming, Daily standups, Retrospectives, Velocity optimization).

PROFESSIONAL EXPERIENCE

Senior Supply Chain Reverse Data Analyst | Google (via Accenture)

Sept 2025 – Present

Leading reverse logistics data analytics, telemetry signal integration, and technical workflow orchestration within Google's technical infrastructure organization.

- **RevFleet WS2 Onboarding:** Spearheading efforts in asset signal sourcing, VRM (Vendor Relationship Management) signal integration, telemetry schema mapping, and Business Requirements Document (BRD) refinement with global cross-functional partners.
- **TaskFlow Implementation & Portfolio Management:** Directing team-level planning, resource tracking, sprint deliverables, and execution governance through TaskFlow Portfolios, ensuring predictable on-time delivery across operational tracks.
- **Advanced Data Extraction:** Designing, tuning, and executing advanced PLX Scripts and GoogleSQL queries across multi-terabyte datasets to optimize data extraction latency, asset recovery tracking, and reverse logistics data hygiene.
- **Executive BI Dashboards:** Developing strategic Looker reports and PLX Dashboards to deliver real-time operational visibility into asset turnaround times, disposition cycles, and vendor performance metrics to empower senior leadership decision-making.
- **Leadership & Mentorship:** Active contributor in the **Mentoring & Training Mavens** program, conducting technical coaching workshops in GoogleSQL, PLX optimization, and data analysis best practices.

Business Intelligence Data Analyst | B2S Núcleos Fintech

Dec 2024 – Sept 2025

Spearheaded the design and deployment of business intelligence architecture and analytics pipelines for regional fintech products.

- Developed and deployed strategic enterprise BI solutions in Power BI, implementing dimensional star schema data models, row-level security (RLS), and custom DAX metrics for financial and portfolio performance monitoring.
- Integrated PostgreSQL databases via Power Query and custom SQL queries, establishing automated ETL refresh pipelines that eliminated manual consolidation and accelerated executive reporting turnaround by 40%.

- Utilized Python (Pandas, NumPy) for advanced financial analytics, cohort behavior segmentation, and credit portfolio metrics, providing actionable insights for executive stakeholders and risk committees.
- Applied Agile BI delivery frameworks, collaborating with product owners and engineers to prioritize analytical backlogs and deliver iterative reporting enhancements.

Lead Manufacturing Data Analyst | Pozuelo (Nutresa Group)

2018 – 2024

Led plant manufacturing analytics, master production scheduling, and digital transformation initiatives across multi-line operations.

- Spearheaded digital transformation and production planning modernization, migrating legacy manual Excel KPI tracking into unified Power BI models, delivering **over \$500K+ in validated operational savings**.
- Architected and implemented Python-based MRP (Material Requirements Planning) simulation algorithms and dynamic safety-stock models, reducing raw material stockouts and lifting On-Time In-Full (OTIF) service levels from 85% to 89%.
- Engineered, tested, and deployed more than 20 Python RPAs to automate repetitive SAP ERP data extractions, production order releases, SQL Server synchronizations, and automated discrepancy alerts via email and messaging.
- Led high-impact CAPEX capital expenditure projects for line modernization, developing detailed cost analysis models per process order to accurately track raw material scrap, line efficiencies (OEE), and labor variances.

System Information Coordinator | Pozuelo (Nutresa Group)

2012 – 2018

Directed plant-floor systems integration, manufacturing data acquisition, and operational reporting automation.

- Led the end-to-end plant digital transformation, integrating real-time Shop Floor telemetry, PLC/SCADA systems, and SAP ERP into unified Microsoft SQL Server relational databases.
- Engineered custom real-time web applications and interactive forms using Google Apps Script and Google Workspace, eliminating paper-based logs across shift changes and quality audit points.
- Championed the plant "Paperless Initiative", implementing MES reporting solutions that reduced operational downtime, saved **\$150,000 annually** in administrative overhead, and improved plant-wide OEE by 2%.

KEY STRATEGIC ACHIEVEMENTS & BUSINESS IMPACT

- **\$500K+ Cost Optimization:** Transformed fragmented manufacturing data into predictive BI models, optimizing line changeover times and raw material consumption.
- **20+ Enterprise Automations:** Built Python RPA and API automated workflows running 24/7, freeing hundreds of engineering hours annually and improving data fidelity.
- **Google Reverse Logistics Telemetry:** Enhanced asset tracking fidelity and telemetry signal reliability across multiple vendor channels, establishing robust data pipelines for recovery operations.

EDUCATION & PROFESSIONAL CERTIFICATIONS

- **B.S. in Information Systems Engineering** – Universidad Hispanoamericana (*Curriculum complete - Thesis Pending*)
- **Google Cloud Platform Analytics Certification** (2025)
- **Google Data Analytics Professional Certificate** (2024)
- **Data Analyst with Power BI** – DataCamp (2025)
- **EF SET English Certificate (B2-C1 High Proficiency)**
- **Data Visualization with Power BI** – Great Learning (2023)
- **Azure Fundamentals** – Great Learning (2023)

LANGUAGES

- **Spanish:** Native Speaker
- **English:** Advanced (B2–C1 Professional Working Proficiency)
